Address: 17A, Kirti Nagar, Sector 15 Part 1, Gurugram

Summary:

Goal oriented engineering executive with keen eye on execution, organizational efficiency and long-term strategy, developing enterprise class consumer internet platforms.

What makes this possible:

Extensive experience in developing highly scalable Consumer Internet technologies (like ecommerce platforms, SAAS etc.)

Good understanding of data structures and algorithms.

Create and Manage rock star team focused in skills, organizational efficiency, process optimization for delivering world class products at lightning speed.

Collaborate with all lines of business, solution providers, technologists and thought leaders.

I love what I do.

Key Highlights: -

Product Strategy and direction

Product Architecture

Engineering Management

Process Improvement

On time product delivery

Product design, development, quality and usability

Good Team Player

Problem Solving attitude

Highly energetic and self-motivated

Able to handle multiple projects at same time

Experience in handling team of 15-20 people

Work Experience: -**Edumonk Technologies Pvt. Ltd (Co-Founder, July 2011 to June 2012)**

It is a startup co-founded by me working in the education domain. The idea was to establish the brand for providing summer training, seminars and placements for students.

Ten Times Online Private Limited (Technical Lead, June 2012 to Dec 2014)

It is an event listing platform earlier known as biztradeshow.com. Played a very important role in migrating biztradeshow.com to 10times.com. Build many functionalities from scratch including an event management dashboard for organizer where they can manage and track whole life cycle of an event from visitor management, exhibitor management, hassle free entry via barcode etc.

*India's biggest trade fair IITF is successfully managed by this software.

Droom Technology Pvt. Ltd (Senior Engineering Manager, Feb 2015 to till date)

It is an ecommerce startup working in the automobile and automobile services only. Joined Droom in it's very early days built many products here from first line of code like Catalogue Management System, Coupon Management System, Cart & Checkout, Orangebookvalue.com etc. Currently managing the whole buyer side of Droom marketplace from homepage to successfully order placement along with DroomCredit.com which is another marketplace for loans.

Skills: -

Programming: JavaScript, JQuery, PHP, Core JAVA(moderate), Laravel, Algorithms, Data Structures, OOPS, Solution Design, Design Patterns, REST API

Databases: MySQL, MongoDB, Redis, Memcached

OS: Linux, Windows, Mac

Education: -

Bachelor of Technology (Computer Science)
ABES Engineering College (2007-2011)

12th (PCM)
Christian Inter College (2005-2006)

10th (Math)
Christian Inter College (2003-2004)

Projects: -

Orange Book Value

It is a platform that helps in determining the fair market price for a used vehicle. It is an algorithmic pricing engine that used real time data science and value depreciation of automobile to suggest market value of used automobiles.

Role: Architecture Design and Implementation

Droom Credit

It is a marketplace for loan which helps borrowers to connect right lenders according to the lender loan eligibility criteria and helps lenders to provide an online paper free solution.

Role: Architecture Design and Implementation

Catalogue Management System

This is the base of core marketplace of Droom. It consists of Category, Product and Listing. Successfully revamped the CMS from launching the new category within few hours from few days.

Role: Architecture Design and Implementation

Ecommerce Cart & Checkout

The aim of this module to enable online transactions on Droom marketplace. It includes Cart, Checkout, Orders, Order flow management and Coupon Management.

Role: Architecture Design and Implementation

Droom International Expansion

Design the architecture for launching the Droom Marketplace, OrangeBookValue and Droom Discovery in multiple countries. Solved the problem for multiple language in the same country and global reporting. Here is list of product countries wise successfully launched.

OrangeBookValue – Malaysia, Singapore, Thailand

Droom Discovery - Malaysia, Singapore, Thailand

Role: Architecture Design and Implementation

Auction & Best Offer

Auction functionality is just same as offline auction where multiple users can bid for the same product and depending on the time maximum bidder will win while best offer is allowing buyer and seller to negotiate on a price and stable a price like bargaining.

Role: Implementation

Biztradeshow.com to 10times.com

Purpose of this project to revamp the old platform to a new platform with new design and revamp the database so that it can be more flexible and scalable.

Event Management System

The purpose of this project to build a robust system for event organizers so that they can manage their event online from visitor to exhibitors to promotions.

Awards and Recognitions: -**Pillar of Success (Ten Times Pvt. Ltd.)**

For revamping the event onboarding panel successfully which reduces the time of event onboarding by 20% and operation cost reduced by 60%.

Top Gear (Droom Technology Pvt. Ltd)

For creating developing India's first algorithmic pricing engine for used automobile within a very tight deadline single handedly.

Top Gear (Droom Technology Pvt. Ltd)

For designing and implementation of Droom Credit (marketplace for loans), and manage to deliver this whole project within required time.

Founder's Award (Droom Technology Pvt. Ltd)

It is very precious award given for very impactful contribution in Droom, very few people got this award till now in Droom.
