Experiences

06/2016 – Present | Hyderabad

Senior Project Manager, Delivery Lead and individual contributor

Travel Tripper India Private Limited

JavaScript | Angular | Ruby on Rails

- Helped in building the initial Travel Tripper Hyderabad engineering team.
- Architect & drive engineering design and develop software applications. Hands-on coding and code reviews. Ensure technical debt is resolved in every iteration and prevent it using best practices including Code Reviews, focus on quality, Continuous Integration and Test Driven Development.
- Manage releases and deployments to AWS. Use appropriate AWS offering - S3, Cloud-front, EC2, Elastic Beanstalk, Lambda etc. based on the application requirement.
- Work with cross-functional team of product managers, product designers, developers and QA to deliver a quality product.
- Discover the true requirements underlying feature requests and translate them into technical solutions. Lead engineering efforts to ensure timely and quality delivery.
- Collaborate with the support team. Triage technical issues and ensure their timely resolution.
- Collaborate with talent acquisition team for screening, interviewing and recruitment of the right talent for the team.
- Mentor, motivate and coach the engineering team members and help them develop and grow along their career paths
- Roadmap planning, Project and Resource management.
- Successfully delivered custom Booking Engine for Marina Bay Sands and Call center application for Caesars Entertainment. Two of the most high profile customers for Travel Tripper. Worked with customer teams and product managers to analyse requirements. Setup the engineering teams, initial architecture and process and lead the teams to successfully deliver the products. I continuously work with the customer and represent the engineering team.
- Maintain legacy Ruby on Rails application and work with the team to add new features.

04/2010 – 06/2016 | Delhi/NCR
